

SetMacAddress

```
graph LR; A[SetMacAddress] --> B[AsciiToMac48]; B --> C[ns3::AsciiToLowerCase];
```

The diagram illustrates a three-step process flow. It begins with a box labeled 'SetMacAddress', which is shaded gray. A dark blue arrow points from this box to a second, white box labeled 'AsciiToMac48'. Another dark blue arrow points from the second box to a third, white box labeled 'ns3::AsciiToLowerCase'. All boxes have a black border and are arranged horizontally.

AsciiToMac48

ns3::AsciiToLowerCase
